

Introduction

Book Systems, Inc. provides the **Atrium on the Go™** application for iPhone®, iPad®, and Android™ devices. Librarians or patrons can use the app to access the library catalog, search for items, reserve or renew titles, read reviews, view **What's Hot** items, log on to **My Items**, and more based on settings and permissions. Librarians can refer to Atrium Help or the **OPAC Handbook**, available from the **Downloads** form, for more details about configuring **OPAC** settings and patron permissions.

This document lists the requirements for your mobile device to work correctly with **Atrium on the Go** and provides steps for installing and using the app. Images in this document are examples; what you see will vary depending on your device.

Atrium on the Go for iPhone and iPad

Review the following requirements to see if your device is compatible:

- iPhone version 4 or higher
- iPad version 2 or higher
- Most current version of Atrium
- Internet connection

Open the **App Store**™ on your device, and search for **Atrium on the Go**. Tap the app from the results to open a page with images, install options, overview information, requirements, etc. Tap **GET** and then **INSTALL**.

You will be prompted to sign in to your **iTunes Store**® account (which must have associated credit card information even though this particular app is free). An icon  displays while the app is downloaded and installed to your device. When it is finished, tap **OPEN**.

Before you can begin using the app, you need to configure settings (covered on the next page).

Atrium on the Go for Android

Review the following requirements to see if your device is compatible:

- Android version 2.1 or higher
- Most current version of Atrium
- Internet connection
- Built-in camera or scanner with auto-focus (required to scan ISBN or barcode)

Atrium on the Go

Open the **Google Play™** store app. (You can also visit <https://play.google.com/store>.) Search for **Atrium on the Go**, and then tap the app from the results to view a page with images from the app, install options, overview information, requirements, etc.

Tap **INSTALL**. You may be prompted to give the app permission to access certain areas of your device; tap **ACCEPT**. You will see a **Downloading...** and **Installing...** message; when the process is finished, tap **OPEN**.

Before you can begin using the app, you need to configure settings (covered in the next section).

Atrium on the Go Settings

The image to the right illustrates the first screen you see when you open the app. To configure settings manually, enter text in the following fields:

- **Server:** – Enter the main DNS or IP address for your Atrium. This is the first part of the address between the double slashes and the first single slash:
<http://samplelibrary.booksys.net/opac/SampleLibrary>
- **Port:** – The default is 80; enter a different number if needed.
- **Library:** – Enter the prefix for your library URL. This is the part of the address after the “/opac/” mention:
<http://samplelibrary.booksys.net/opac/SampleLibrary>

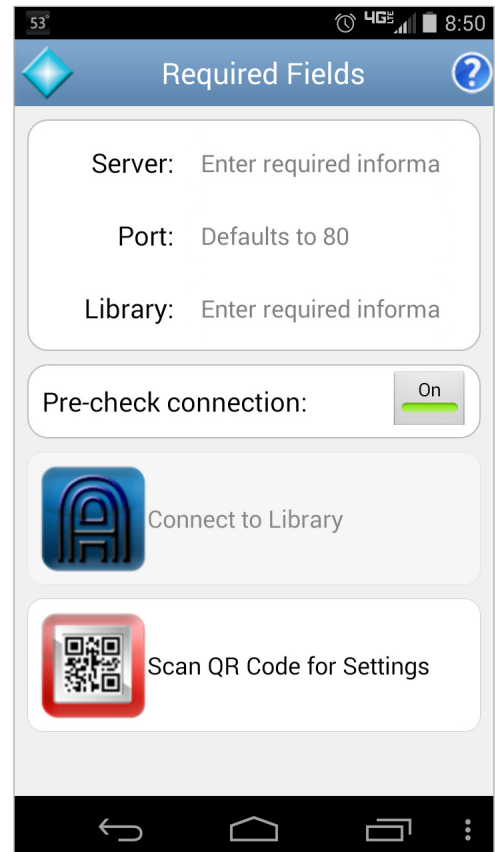

To configure settings automatically, librarians can generate a QR Code, which is a barcode with an embedded URL that mobile phones can read; then anyone who uses **Atrium on the Go** can scan the code to populate settings fields.

- Locate a QR Code generator. For instance, you could visit <http://beqrrious.com/qr-code-generator/>.
- Create a code using the base URL to your **OPAC**, such as **<http://samplelibrary.booksys.net/opac/SampleLibrary>**. In most cases, you can simply select your type (Web URL) and enter the address; you may also be able to designate a color.
- Print or download the graphic image and embed it on your library Web site.

You can post the code by the circulation desk or on your library's Web site so patrons can easily set up the app on their mobile devices.

- While on the **Required Fields** screen pictured here, tap **Scan QR Code for Settings** and then scan the code to automatically insert data.

Atrium on the Go

Atrium on the Go Features

Once you have settings configured for the app on your device, you can use either of the following options when you open **Atrium on the Go**: **Connect to Library** or **Scan ISBN or Barcode**.

You can tap the **Connect to Library** option at any time to open **Mobile OPAC** (pictured to the right). From here, you can search the catalog by entering terms in the field at the top, or you can access other features by tapping an icon.

You can tap **Scan ISBN or Barcode** to connect to the camera or scanner on your device, scan the ISBN or holdings barcode, and search your library catalog for a match. You can scan an ISBN on an item in a local bookstore to see if your library has a copy, or you can scan a holdings barcode on a library item to find more details, reviews, etc. saved in the catalog.

Product Support

If you have questions about **Atrium on the Go**, please call Book Systems' Technical Support Staff at (888) 289-1216 or send an e-mail to support@booksys.com. Business hours are Monday through Friday, 7 a.m. – 7 p.m. Central Standard Time.
